- Creative
- Time-Management
- Problem Solving, interpersonal skills
- Quick Learner
- Team Player, Collaborative
- Enthusiasm

ABOUT ME

After many years focusing on artistic design, ranging from most Adobe products, 3D modeling and animation to graphic design, I have transitioned into Software Development. Coding is at the core of building innovative and visually appealing products which led me to learn languages and frameworks, gain hands-on experience in building full-stack web apps, and design responsive user interfaces for better user experience; allowing me to grow into a solid Javascript Developer. I am eager to contribute my creative talents to a dynamic software engineering team and continue building cutting-edge applications.

PROJECTS

FETCHFIND | UI DESIGNER AND CODER

React / JSX / SASS / API

- A platform that provides users with access to real-time data from the PetFinder API, allowing them to browse and adopt dogs in need of a forever home.
- Leveraged attention to detail in the wireframing process to meticulously plan the layout, navigation, and functionality of the site, resulting in a visually appealing and user-friendly interface.

UKG INDUSTRY PROJECT | FULL-STACK DEVELOPER

React / SASS / express / nodemon / knex

- Created and developed the winning solution in a project held by judges from high-level tech positions at UKG. Their feedback, including the quote "one of those things that is so simple yet effective" was both humbling and gratifying.

2YE CLOTHING BRAND | LEAD UI DESIGNER & LEAD FRONT-END

React / JSX / SASS / API

- Originally coded with HTML, CSS, and JavaScript; fully responsive website that retains brand consistency through design, created in under 6 hours.
- While we were awarded 2nd place based on an applause-based system, the event organizers personally expressed their admiration for our project as 1st place worthy.

WORK HISTORY

LOAD COORDINATOR TO OFFICE MANAGER

Fr8 Pros Corp | March 2019 - January 2023

- Managed all employees records and account details including log books and MVR reports.
- Used Amazon logistic services on a daily basis to arrange loads for drivers via dispatcher request and coordinated timed delivery to maintain account success rate.
